# Miami's Industrial Market Experiences Robust Leasing Activity and Rising Vacancy Rates Amid New Construction Deliveries

Miami's industrial market continues to outperform other asset classes as the U.S. economy entered into its longest expansion period in history during the third quarter of 2019. Robust population growth, largely fueled by migration from high-tax states in the northeast, as well as the rapid growth of e-commerce continue to propel demand for logistics space near growing population centers. Economic fundamentals held steady as Miami's unemployment rate declined to 3.5% as of August 2019, a 50-basis point (bps) decrease from the year prior. Although leasing activity has been strong throughout 2019, net absorption has slowed in the latter half of 2019 (up by 325,706 sf over the quarter) as speculative space continues to be absorbed into the market. Also, almost all significant leasing activity that took place during the third quarter was dedicated to pre-leasing at buildings currently under construction and will not be included in net absorption until those buildings deliver later this year. Since the beginning of 2018, Miami-Dade County has had 6.8 million sf of speculative development deliver, of which 83% has already been leased. The overall vacancy rate rose to 3.41% during the third quarter, an increase of 64 bps over the trailing 12 months ending September 2019, largely attributable to the delivery of new speculative projects. Average asking rental rates continue to surge higher as demand continuously outpaces supply. As of the third quarter, the average asking rental rate reached \$9.00 per sf for the first time, up \$0.22 from the third quarter of 2018. Bulk distribution rental rates also experienced an increase to \$8.27, up \$0.73 over that same time. Despite global headwinds, Miami-Dade County's industrial market has more runway left for continued growth.

Of the 6.8 million sf of speculative development that has delivered since the beginning of 2018, 83% has already been leased

### Industrial Market Snapshot

- During the third quarter of 2019, Florida East Coast Industries proposed building a 1.1 million of distribution warehouse facility for Home Depot within its Countyline Corporate Park development. The project would have two buildings, one for a market distribution center and one for a flatbed distribution center. There will also be a "cross-dock" design for the buildings.
- After a boom in speculative construction activity in 2018, several speculative developments have been added to the market throughout 2019. During the third quarter of 2019, a total of 1.1 million sf of speculative development delivered with notable completions including Building 8 of Countyline Corporate Park (+241,187sf), Building 9 of the South Florida Logistics Center (+190,850 sf), Building 5 of Gateway Commerce Center (+186,182 sf) and buildings 1 and 2 of Miami Central Commons (+318,043 sf).
- Following a slight lag in investment sales volume during the second quarter of 2019, industrial investment sales surged during the third quarter. Investment sales volume totaled \$1.26 billion for the trailing 12 months ending September 2019, a substantial 18.5% increase over the same time last year. For the third quarter alone, Miami-Dade County industrial investment sales totaled \$462.3

- million. Also during the third quarter, Miami-Dade County recorded the largest industrial sale of the year in the state of Florida. RREEF purchased the three-building Centergate at Gratigny industrial park for \$178 million, or \$112 per sf. The largest of the three buildings last traded for \$78 million in 2015, or \$80 per sf.
- While industrial assets continue to attract significant investment interest from institutional investors, nontraditional industrial buyers are now starting to take an interest in the industrial market. A prime example was the recent announcement from Thor Equities, a real estate development, leasing, and management firm that primarily specializes in office, retail, hotel and residential assets, that it would be launching a new division called ThorLogis that will focus exclusively on logistics assets.
- Although there has been some concern surrounding the industrial market regarding a global economic slowdown and escalating trade tensions, Miami-Dade County, and South Florida as a whole, are likely to weather any threats posed by tariffs more easily than other industrial markets due to the region's vigorous population growth and robust port activity.

Reporting Methodology: This report includes all industrial buildings and parks 20,000 SF and greater in Miami-Dade County that are not government owned. All rents are reported on a triple-net basis and are direct weighted averages calculated on total available space. The information in this report has been collected by the Avison Young research team via sources that are deemed reliable but is not guaranteed.

Although vacancy rates have risen over the last 12 months, much of the rise is attributed to new construction deliveries in the latter half of 2019.

South Florida Logistics Center - Building 9

# Final Building at the South Florida Logistics Center Sold for \$32.7MM

During the third quarter of 2019, Florida East Coast Industries (FECI) and its subsidiary, Flagler Global Logistics, sold the recently completed final building of the South Florida Logistics Center to J.P. Morgan Asset Management for \$32.7 million, or \$172 per sf. FECI origionally sold the first five buildings of the park to J.P Morgan back in 2015 for \$209.2 million and signed an agreement to sell the additional four buildings to the group upon construction completion. Now that all nine buildings have been sold at the park, the total transaction value is \$295.2 million.
